

Wings of Hope Offers Healing Touch Services

Healing Touch is a relaxing, nurturing energy therapy. Gentle touch assists in balancing the individual's energy field, which supports their natural abilities to heal: physically, mentally, emotionally and spiritually.

Certified Healing Touch practitioners have completed over 100 hours of training, provided 100 healing touch treatments, participated in a one-year mentorship, and have demonstrated that they have met competency in Healing Touch and abide by the Healing Touch International Code of Ethics/Standards of Practice.

Carolyn Ettinger, Licensed Mental Health Practitioner at Wings of Hope Cancer Support Center, is also a **Certified Healing Touch Practitioner** who has been practicing Healing Touch at Wings of Hope for three years.

Carolyn believes that the mind, body and spirit are fully connected and that each individual has amazing healing abilities. She will be working to blend the guided imagery she currently uses in counseling with the practice of healing touch. Both guided imagery and healing touch provide empowerment to the individual and a sense of wholeness.

Please call 712/325-8970 to schedule your Healing Touch appointment. Each session is approximately 1 hour in length.
